### **Annotation:**

It would not be wrong to say that today Uzbekistan has entered a new stage on the way of development. The reforms implemented in Uzbekistan under the leadership of our head of state, the large-scale creative works, the efforts aimed at serving the interests of the people in all directions are rightfully recognized not only in our region, but throughout the world. This gives more energy to each of our countrymen, who are working hard to establish the New Uzbek tone and lay the foundation of the third Renaissance, who are selflessly fulfilling the tasks assigned to them in the spirit of high patriotism.

**Keywords:** Education role, spiritual and educational, economy, patriotism, spiritual renewal, renaissance.

### **Introduction**

Reforms in the spiritual and educational sphere and their further deepening are of decisive importance in the formation of a new Uzbekistan. As the head of our state noted, we all understand well that if the body of society is the economy, then its soul and spirit is spirituality. We rely on these two strong pillars to build New Uzbekistan, that is, a strong economy based on market principles and a strong spirituality based on the rich heritage of our ancestors, national and universal values. " For us, spirituality is a set of exemplary qualities, mutual trust, respect and attention between people, noble aspirations to build the future of the nation and the state together.

In other words, spirituality is the foundation that determines the content and quality of all political and social relations in society. The stronger this foundation is, the stronger the nation and the state will be .

The new strategy of the spiritual education system being created in our country ensures raising the quality and content of the spiritual and educational work promoted among our people, especially among our youth, to a new level. Pointing out the main task in this area, the President said: "It is a good thing that our youth will grow up to be independent thinkers, have high intellectual and spiritual potential, and become

people who are not inferior to their peers on the world scale. we will mobilize all the strength and capabilities of our state and society to be "

the international arena, the increasing of various threats in the educational sphere, the gradual development level of the dynamics of changes in our spiritual life, the implementation of general laws specific to it, and the related national characteristics require us to pay special attention to it. is enough. Commenting on such threats, the President of the Republic of Uzbekistan Sh. Mirziyoev states: "The danger of threats such as terrorism, extremism, transnational and cybercrime, human trafficking, and drug trafficking is increasing.

Harmful ideas, concepts and views that are absolutely foreign to our national spirituality, without breaking the boundaries, without expressing, so to speak, become "uninvited guests" in our homes, our society, and worst of all, the pure hearts of our children. and we cannot turn a blind eye to the fact that it is entering his mind. "

Here it is so in the circumstances in our society spiritual education role sharp increased is going Spiritual in terms of watchful being live, young people national and universal values in the spirit education in them ideological immunity formation Demand is being done . This is manifested in the following areas?

First of all, in the conditions of rapid globalization of the information world, there is a feeling of relaxation and emptiness in our spiritual life, in the spiritual consciousness of young people. As a result, some young people with weak ideological immunity unknowingly follow various forces in everyday life, walking, standing, and acting. It is correct to say that the lack of knowledge and will is the reason for not recognizing our national identity and our great ancestors.

Secondly, we should all be concerned about the declining role of the public, especially in the education of young people. The activities of a number of state and non-state organizations related to youth education are not visible in terms of systematicity, coherence, joint action around the high goals set forward. It is true that the greatest danger to our spirituality is the increasing indifference and indifference of most of our people.

Thirdly, corruption, greedy bureaucracy is hitting us not only in economic but also in spiritual life. A large-scale fight against these evils has begun. But life itself shows that we cannot get rid of these problems unless we all fight against this danger together and increase public control. These vices undermine the confidence of the population in the reforming state.

to analyze the socio-spiritual environment on a scientific basis in the conditions of current ideological-spiritual processes, especially in the globalization of the information world, to improve it, to reform it based on modern conditions, to evaluate

the results of spiritual-educational works. work on the mechanisms related to improvement and strengthening of the promotion system is gaining importance. "It's no secret that being a preacher of spirituality requires a lot of knowledge and potential, skill and tireless mental work. But, unfortunately, for many years, sufficient attention has been paid to properly encouraging the work of employees in the field of spirituality and enlightenment. Now is the time to solve this problem, and we are taking important steps in this regard.

The most important thing is to strengthen the foundations of spiritual education in the continuous education system, and in this, it is necessary to take into account the young characteristics and aspirations of the growing generation. This rule is not followed in the organization of spiritual and educational activities.

The current rapid development and globalization processes are putting before New Uzbekistan the difficult task of raising a mature generation that will ensure its bright future and adequately overcome the trials of life. This, in turn, requires the formation of the future moral and spiritual image of the young generation being brought up today. Such an honorable task is supposed to be carried out through continuous spiritual education in our country. In this, first of all, we rely on the education of our great ancestors who made a worthy contribution to the development and civilization of our great ancestors, rich in wisdom and values, and the exemplary education that we give to our successors - our descendants.

In this place, it is worth noting that in terms of the direction of continuous spiritual education, mainly spiritual (spiritual), legal, economic, physical, moral, adulthood (relating to the relationship between boys and girls ), it is divided into ecological and aesthetic, work, thinking and education.

Let's not forget that the prospect of New Uzbekistan directly depends on how carefully and how conscientiously the very responsible task of ensuring a bright future of the young generation is carried out.

In other words, regardless of the nationality and religion of every young person living in Uzbekistan, a program will emerge that directs their behavior, behavior, and lifestyle towards purity, goodness, and creativity.

these principles is to present Uzbekistan in the eyes of the peoples of the world as a land of inventors, honest entrepreneurs and highly talented and cultured people.

The aim of this is to create an image of a morally perfect person in a multi-ethnic country, in which beautiful morals, loyalty to the motherland, and human qualities are praised, to inculcate the feelings of goodness and creativity in the hearts of our fans, to enrich the modern society of Uzbekistan with the qualities of perfection and strengthening.

In such a complex situation, in order to educate the spiritual world of young people who can withstand such ideological pressure, it is becoming a necessary requirement of life for state and non-state organizations whose activities are related to youth education to follow the solution of the following tasks in their activities:

- Preventing various acts of spiritual destruction and destruction and attacks that are increasingly active in the international arena, forming a strong spiritual immunity in the minds and spiritual world of the population, especially our young people, promoting good ideas. focus on doing;

- A spiritual education that relies on the achievements of modern social science in order to eliminate the destructive ideas and forces that are being committed in the international arena, following the ignorance, the general low level of belief in the destructive ideas and giving in to their influence. to achieve consistent implementation of education;

- In this regard, the stages of education are the preparation and implementation of educational and practical programs necessary for the system of spirituality and enlightenment;

- To raise the spiritual and educational literacy of the population to a new level, to determine the educational work in this direction, to create an effective mechanism of activity in this regard;

- Improving activities aimed at ensuring information security, strengthening its social-spiritual, legal-normative aspects;

- Improving and harmonizing the activities of various spiritual and educational associations is of urgent importance in raising the spiritual world of young people, raising them in the spirit of respect for the national spiritual heritage, national values. Wide application of modern information and communication technologies in the field, effective use of media opportunities.

In this, it is assumed that every citizen, regardless of his nationality, religious affiliation, gradually strives towards the image of a spiritually perfect person and gets rid of his bad vices. So, the young generation, which is considered our support and support, is the owner of a good upbringing, and with its high potential, enthusiasm and patriotism, it will create the New Uzbekistan - the Third Renaissance in our country. And spiritual education will further expand the ranks of creators of New Uzbekistan, and lead the nation towards great goals.
