

PSYCHOMETRICS OF SOCIAL TOLERANCE IN STUDENTS

Mahliyo Sattorova(PhD)
Termez State University

Abstract

The tolerance is the ability or willingness to tolerate the existence of opinions or behaviour that one dislikes or disagrees with. The societal tolerance is the endurance to surrounding environment, individuals that brings blessings. It is one of the most important tools a child needs in his or her toolbox is the ability to tolerant of others.

Keywords: social tolerance, willness, student, psychology, feeling, sincere, psychometric

Introduction

Humanity and society in the process of globalization of the culture of tolerance among the many who appear in front of mummolar occupies one of the most basic places. The humanity of the twentieth century to a large positive socio-economic achievements, that is, to be a growing number of independent states, democratization and civil society to establish a free society, international relations, integration, along with the heavy burden of social and international conflict like that needed to be resolved, great shovinism of statehood, fundamentalizm malformations such as the inheritance of religious extremism and left. Thisissue is how to convert a culture of tolerance all over the world is showing the importance of human values. In the context of globalization and new social reform minded individuals to educate requires serious changes in the education system. Among the countries of the world that has this description the first human in the republic of uzbekistan on konseptual problem solving the theoretical basis has been created and has been applied in practice in a systematic way.

Tolerance— may us of our life, the rich variety of data from denmark, selfexpression and the diverse methods human alohidaligi major show of respect, acceptance and understanding means. His knowledge, friendliness, and open communication thought, conscience and religion brings into the body. It is through the union of various tumanlik tolerance. This is not only a moral duty only, but also the political and legal needs. Tolerance is the one who challenges the achievement of peace and is the one who transmits the culture of peace from the unculturality of war.

The side of tolerance, to give worries or not. Tolerance is, above all, the recognition of the universal rights of man and basic freedoms, formed on the basis of the relationship is active. The tolerance in any situation besides these basic values the service of

aggression is not an excuse. Tolerance particular individuals, groups, and should be the manifestation of the state¹.

Find rights explain human decision tolerance, plyuralizm (including cultural plyuralizm), democracy and the rule of law to support the celebrations of commitment. Tolerance is a concept that implies the abandonment of creationism, absolutism of reality and affirms the rules established in international legal documents in the field of human rights.

1. **Tolerance.** His relative tolerance of students in private secondary usual phenomenon in relation to sex and age characteristics associated with the situation, the condition will reflect that, as well as their expression finds. Also, the moral contours, unpleasant, thus, cast out from the spiritual world the effects of the controversial cases when save the cake, seeing you are not getting removed to afford those who feel directly:

2. Training in the process of circulation, out of the audience in the relative price of non;

3. Feeling, take away from the spiritual world of the consequences of the situation;

4. Course team members, the relationship between parents forget unpleasant complete ²

5. I admit the confession comparisons, comparisons, and ask forgiveness of human, social qadriyatli realized he had when beayb, perfect, perfect understanding of human nature and the miracle that society and others.

Cordiality. No one in the society owns professional, and social development of the state the opportunity to interpret the problem at a high level, the responsibility of higher education institutions teachers full-fledged does not reflect. Therefore, in the universe, in one country in the territory, the place of residence is in the reality that it does not leave you indifferent. Interest because each seeks to know the essence of reality of all things, different experiences, emotions, and creative activity completion of construction, the sense of responsibility to him installs.

And this relationship will reflect the experiences of high school teachers in the following features:

6. All age periods, in different ethnic groups and nations dealing with the same access to sharing, to establish communication in the embodiment;

7. The discussion featured a variety of problems in different stages of active participation;
8. Will demonstrate a wide range of human qualities; to draw young people from students in a large held in various educational effects;
9. Chat, kezi showcases the perfect shirinsuxanlik circulation and communication;
10. Take away from unpleasant experiences', chance out of the situation difficult situation the students in the spiritual, in order to prevent the birth of malformations in the process;

Increasing the activity participants in the training camp, reading, inspired to achieve high success in the labor process and the others.

Sincere (sincere). Students of higher education, the course team, in the neighborhood of the positive unfolding, events to events and the relatively warm taraqqiyparvar represents the sincerity of attitude. His main essence of the following cases by reflected to be observed:

1. The activities of colleagues, behavior and treatment of the effect of grace, compared to the achievements in the goodness on the shore;
2. Gain realization of the complexity of the disciples the authority to order, quick order in the relation of naturalness;
3. It featured the expansion of relations between different members of the family, of qutblanish (opposite to the separation of the two poles), priority will be professional, empatiya, simpatiya, antipatiya, attraksiya feel like a rational approach to feeling;
4. The citizens in the neighborhood, their behavior-behavior, business, ishbilarmonligi objective in assessing the qualities and features like;

The history of Termez state university tempted this research group (50 students) and foreign languages philology (50 students) of the faculty of students, a total of 100 people, we chose the participants. The participants are boys and 50 girls 50 students will tashqil index on the gender.

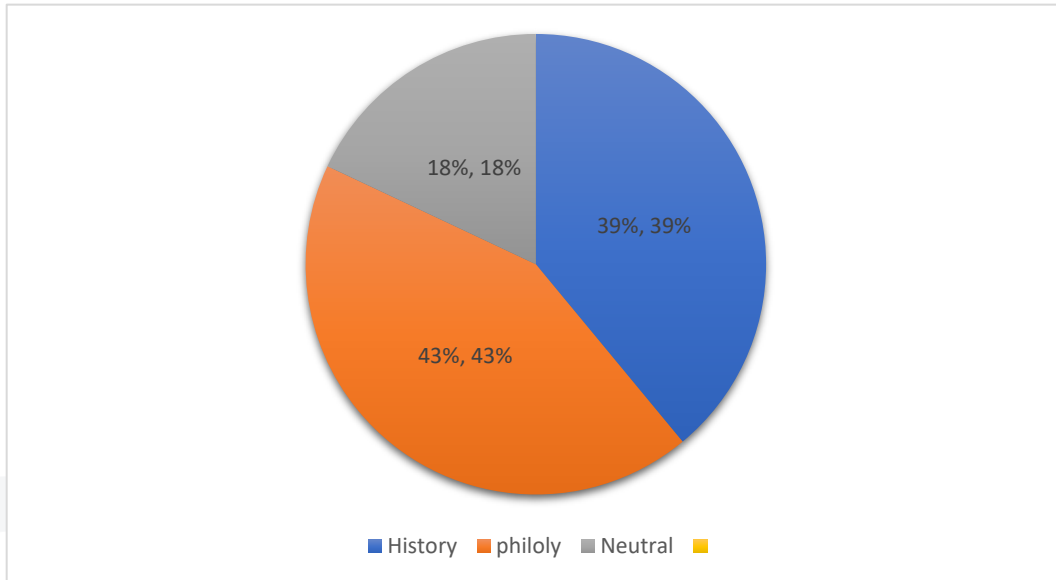

Participants	the number of	%
Boys	50	50
Girls	50	50
TOTAL	60	100

Jadvaldan as seen boys and girls, equal to the ratio distributed: - boys, 50 students (50%), the girl child of the 50 students (50%).

Our research objective person considered equal distribution of boys and girls studying tempted in the group properties, is of great importance in having reliable evidence. Below, we will pass information about induced research methods are used.

Perfect human sciences doctor of psychological assessment tests, developed by professor e. by g'oziev if it is found it is probable that the seven blocks from tashqil. In each block performs a specific function and serves to identify certain qualities and characteristics of the perfect person. The seven blocks of five basic block is, their 2tasidan were used, each of which 10 than qualities(qualities)to cover it is probable that. The first, and ikkinchi blocks assistant as using named, its own specific complex to'zilishi to be able to be, the person the individual features of serqirradir deeper resolve to help will. This test 1995 years since in practice applied being are, same as the reason for its reliability, will validlik and reprezentativ of no kind of doubt there. The essence of the test is taking place from every situation, "Weak", "Moderate", "Strong", "Very strong" is based on a scale designed to answer. In the given order situation "1", "2", "3", "4" and will be evaluated with a score of "3", "4", "5", "6" grafa is determined. A period was set at two and flyers will admit that the situation is absolutely forbidden bo'zib.

Been suggested that in the main block are in perfect proportion to the man qualities (qualities) are there, along with the absence or determine, noted his rule is expected to be tempted by. Block Biririnchi the assessment of the situation (points) is not allowed, so information on it is tempted to serve it. The first block in the "**general**

information about the person”, using the surname of the participant, name, initials, sex, age, place of work, study material allows to collect.

Methods of the second block of **“the social condition of the person features”** called the ten qualities hugs (believe me-belief is not sobitqadam not hamiyat, not contributors, frankness, modesty, fairness, humanity, sacrifice, and patriotism). The third block **“the general features of a person”**, using it will cover the following qualities: muloqotmandlik, enthusiastic, mobility, ingenuity, attentiveness, diligence, and determination to not be comfortable aspiration, independence, self boshqaruvchanlik.
